| Canada | 2.20 | Grove Creek | 2.20 |
| South Dak. | 2.20 | Big Muddy | 1.90 |

Big Deal at Beggs

S. M. Goldsmith of Carrier and company of Kansas City has purchased all of the interest of S. S. Mathew in the oil fields of 11 and 12 in range 11, covering an acre in 580 acres. There is one 25-barrel well in the Red Fork sand, with one well drilling on top of the Glenn sand, which is making heavy gas and it will either be completed in the Glenn sand for a gas well or drilled to the deeper sand. This is one of the largest deals completed in the Beggs district in some time and the consideration is said to be quite large.

Water Situation
Proving Serious

So far no improvement has been registered in the water situation throughout the Oklahoma country and is proving to be one of the greatest handicaps to this district. It has had a deal with there. There is hardly a day goes by but what some of the numerous wells are forced to shut down.

In the Henryetta district there are something like 75 drilling shot down waiting for water, while there are over 100 rigs that would be secured if water could be secured.

It is hard to tell just what the outcome of the water situation is to be, but it is a settled fact that it is keeping back considerable development and improvement of new pools and possibly the opening of many more.

Atlantic's Well Showing

Good at Beggs

The well of the Atlantic Petroleum company No. 2 in 19-15-11 is in top of the sand and is showing for a nice well. It will be completely drilled in today. So far we are unable to give an estimate of the sand depth, but it is in the Dutcher sand. The well of the Producers and Developers corporation in the Wilcox sand, is drilling in the Wilcox sand, excepting to reach the 3,000-foot sand at night. This is one of the most important tests in this district and should it prove up, it will make this pool one of the best in the entire state, giving it three good producing sands in the Glens, Dutcher and the Wilcox and all eyes are turned in this direction, hoping for a good producer.

Somebody Got Their
Wires Crossed

According to a telegram just received from Dallas from Prentiss Moore, who has just returned from his vacation, he states that the wells of Hamil and others in the Lewis farm, which were reported in The World yesterday morning as extending the field northeast, is in error and should read "Desdemona pool extended four miles northwest" and is due to an error made by his assistant.

Has Two Gas Wells

SHUT IN
FONCA CITY, Okla., Aug. 27.—The Kas. County Gas company, which with the Marland Refining company is doing a lot of development work in the northern and eastern portions of this county, has two gas wells shut in on the Helleson farm, ten miles northeast of Ponca City. It is understood these wells are connected with the company pipe lines. A gas well is being drilled by the company in the vicinity of Newkirk.

All Smiles Today

O. N. West of the firm of West, Brown and Wren, is the proud father of an eight-pound baby girl, who was born Tuesday afternoon, 1:30 p.m. at his residence on 1601 South Boston. The mother and baby are progressing nicely and the father is all smiles.

Deep Test in the Osage

West, Brown, Wren and Morrison are moving in for a deep test on the Anna Tyner farm in the northwest of 24-28-12. This lease was once old Pern and Bartlesville sand wells.

Location for Deep Test

West, Brown, Wren and Morrison have made a location in 20-14-19 for a deep test.

In the Osage

The Gypsy & Phillips No. 5, 810 feet from the south line and 360 feet

OILANDGAS

Lease, Supplies, Production, Etc.

Hughes and Seminole county oil lease, send for bid. W. J. Ryan, Holdenville, Okla. Phone 155—Advt.

For Sale

Have good engines on Plaza or Katy, close in locations. McNease Inv. Co., 406 Central Natl. Bank Bldg., Osage 3422—Advt.

Have cash ready to buy gas tanks and oil royalties. Give full particulars with age-wells, income from last year, price, etc. Address F. C. Day, 88, Tulsa—Advt.

One standard string of tools for sale located 3-14-11. Write Mr. S. T. Collinsville, Okla. Phone 444—Advt.

Leave for sale—48 acres on the structure, Garfield county, Okla. Well now drilling down 400 feet. Priced right, overdrilled, must sacrifice something. Write or wire Sommers at Y. M. C. A. hotel Tulsa—Advt.

If you want oil leases in the south part of Bryan county, Oklahoma, write G. T. Green, Achilles, Okla.—Advt.

From the west line in 20-24-9, has the sand from 2,015 to 2,100 feet from oil showing at 2,070 feet, and made 80 barrels the first 24 hours. They landed their 6-8-10, and are on top of the sand at 2,040 feet.

The Kansas No. 1 in the horizon of the northeast of 20-28-7 is drilling at 2,828 feet.

At Billings.

Guffy-Gillespie oil company No. 5, McNaughton in the southeast of northeast of 21-23-28, has sand from 2,010 to 2,075 feet and made 12 barrels the first 24 hours.

The Kansas No. 1 in the center of the southwest of 20-28-7 is drilling at 2,828 feet.

The Deamer & Jamison No. 1 in the northeast of northwest of 22-11-11 is drilling at 1,225 feet.
